Information and working arrangement

In the CSO, the body is perceived as a functional unit in which everything is in motion, connected to each other and mutually conditioned. If the conditions for a healthy and balanced body are optimally, the body is able to respond adequately to changes with a high degree of flexibility and thus preserving health support.

Through gentle touch CSO therapists are able to feel existing tensions and movement patterns of individual body structures such as bones, muscles, fascias or even organs.
This is where the CSO starts, by trying to harmonize tensions in affected structures, to give your body the opportunity to adjust itself to a new situation and adapt its movement patterns to circumstances, without disturbing the healthy processes. The body's own healing powers are stimulated and supported.
Within the meaning of holistic approach, a CSO treatment can influence you physically and emotionally. Especially in the first week after a treatment reactions can occur.

The duration and therefore the costs of a treatment are very individual. What is constructed about years (for example by stress at work) or by a sudden external impact (accident, trauma), cannot be solved after a single treatment. That would be an excessive demand for the entire system.

To support the body optimally in his healing process, a regular four to six weeks rhythm is important. According to that a phytotherapeutic treatment can be useful. It depends on your requirements.

Appointments are binding and must be paid when they are not canceled at least 2 working days in advance or be laid.

A CSO session normally takes 60 minutes and costs 70,-€.
Children treatments can vary in duration and so the costs range between 30-50,-€, depending on the treatment time.
Phytotherapeutic advice and repertorisation is settled according to the GebüH (schedule of fees for medical practitioners). Depending on the amount of time spent, the costs range in a frame of 15-25,-€.
The first session takes about two hours. No further costs are incurred.
Please transfer me the amount within 7 days on the account mentioned on the bill.

The treatment costs of the medical practitioner are not covered by the public health insurance. Private Insurance and Aid funds may not cover the whole costs.
As a private patient you are informed that you are responsable for managing the reimbursement process with the possible cost carrier.
However, a non- or partial reimbursement of a private insurance has no affect on the overall cost for the service provided.

If you have any questions, please feel free to call me or leave a message on the band. I'll call you back.
